High Performance Invisible Loudspeaker

DATASHEET

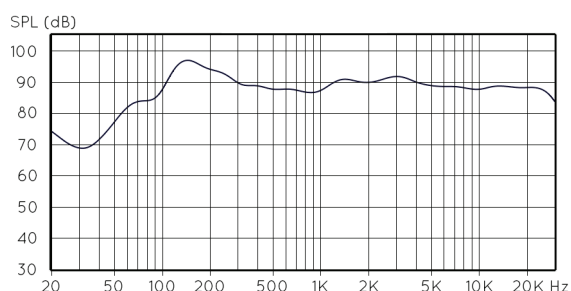

V1.0

THE INVISIBLE SPEAKER CO.

Product Description

Rendered behind a 2mm skim of plaster, the Amina Mobius7 invisible loudspeaker pushes the sonic boundaries of what is possible with plaster-over loudspeaker technology. Building on the award-winning Evolution Series design, the Mobius incorporates OptiDrive and OptiDamping technology as well as Reduced-Resonance Exciter technology, offering greater low frequency extension and smooth high frequency dispersion all the way to the ultrasonic region. These developments allow for unprecedented high frequency performance and detail, enhanced bass reproduction and increased power handling, all in the easy to install, lightweight form-factor that Amina is known for.

Example Applications

Residential distributed audio solutions, multi-channel surround sound and high end commercial installations.
